

AI OWL: Automation Developer

Location: Remote

About the Role

AI OWL is launching the **AI 2.0 Initiative**, a movement to empower everyday learners with the tools and knowledge to create their own AI-powered solutions. As an **Automation Developer**, you will play a key role in guiding participants through the process of building and deploying AI-powered automations, chatbots, and AI-enhanced workflows. This is a hands-on development and mentorship role where you'll collaborate with learners, helping them turn their AI ideas into reality.

What You'll Do

- **Work directly with AI 2.0 cohorts** to help them build and deploy AI-powered solutions using tools like custom GPTs, APIs, Make scenarios, and other automation platforms.
- **Automate workflows** for businesses, educators, and organizations looking to integrate AI into their operations.
- **Provide technical mentorship** to learners, troubleshooting their projects and helping them scale AI solutions.
- **Stay up-to-date on the latest AI trends and automation tools** to ensure our cohorts are using the best possible technologies.

What We're Looking For

- **Technical Skills:**
 - Experience with AI automation tools such as Make, custom GPTs, and workflow automation software.
 - Basic understanding of APIs.
 - Basic programming experience (Angular, Python, or React are preferred but not required).
 - Proficiency in applications of AI tools.
- **Soft Skills:**
 - Strong communication skills.
 - Ability to break down complex concepts for non-technical users.
 - Problem-solving mindset with a focus on innovation.
- **Bonus:** Experience working on real-world AI automation projects or teaching AI concepts to others.

Why Join Us?

- Work on cutting-edge AI projects that directly impact businesses and individuals.
- Be part of a growing team that is shaping the future of AI education and deployment.

- Opportunity for career growth into AI OWL's software development team.
- Flexible remote work environment with a collaborative, mission-driven team.
